Duct Mount
Catalogue Number : 9000114 : Rev. 01 Dated 11-10-2014

1. Compliance:
   a) British Standards, BS 3974 : Part I

2. Application:
   a) To control transmission of noise to the building structure, Starline Duct Mounts serve as acoustic separators between sources of high frequency vibration and their suspension rods. Some example applications are illustrated below.

3. Product Features:
   a) Resilient rubber grommet with steel load distribution cups and extended sleeve, designed to reduce transmission of structure born noise from air ducts and suspended equipments / small pipes.
   b) Supplied complete with top and bottom steel load distribution cups, electrogalvanised after manufacture for maximum corrosion resistance.
   c) Extended sleeve of rubber element prevents metal to metal contact between suspension rod and suspension bracket / trapeze channel.
   d) Available in two different sizes to suit width of duct / equipment suspension channel.
   e) Colour coded for identification of Capacity.
