About us:

PROMISE OF EXCELLENT NUTRITION FULFILLED BY QUALITY.....

SDA PRODUCT is a well-established company since 1990 engaged in providing high quality Animal Feed Powder in India and abroad with other minerals mixtures and vitamins as per clients requirements for animal consumption. The products, we offer, are extremely beneficial for Animal Health. Offering quality products, the company has become one of the sought-after Manufacturers, Suppliers, and Exporters of Animal Feed Powder. We use imported base material in the manufacturing process. The Animal Feed Powder is manufactured in a hi-tech manufacturing setup with the motto of bringing forth the best quality products at competitive prices. The company was formed with an aim to create a stronghold for itself in Indian Veterinary Industry by providing best quality Animal Feed Powder. After achieving respectable status in Indian Veterinary Industry, the company is now catering to the Global Veterinary Industry. With the cooperation of several Research Institutes and Pharmaceutical Companies, we provide high quality and effective Animal Feed Powder.

Our Infrastructure:

RESEARCH AND PRODUCT DEVELOPMENT:

- SDA PRODUCT has a dedicated team of chemists and consultant scientist with expertise.
- Our R&D team expertise coupled with use of modern analytical instruments ensures that we produce consistently high quality products.

Production

SDA PRODUCT boast of good infrastructure that includes land, building, machinaries and manpower. Our facility with 50000 sq feet space is located in Gujarat. We are well equipped with state of art machinery to produce quality feed supplements products. Our trained personnel adhere to stringent quality checks to ensure international production standards

Quality Control

SDA PRODUCT quality control team comprises of expert technical staff to monitor and control laboratory checks for quality & stability of the products from raw materials stage to finished products.

Our technical team applies stringent quality checks at the following stages:

- Analytical testing and acceptance of raw material
- Semi Finished products
- Finished Products
- Packaging and labelling finished products
Manufacturing Speciality

Product List

PREMIX- CHOL FEED GRADE
- Premix Chol 97% - 98% F. G.
- Premix Chol Cerial Base 60% F. G.
- Premix Chol CORN COB Base 60% F. G.
- Premix Chol 75% F. G.
- Premix Chol CORN COB Base 50% F. G.
- Premix Chol Silica Base 50% F. G.

Premix Chol for Oil & Gas Exploration
- DCP (Di-Calcium Phosphate) F. G.
- TCP (Tri Calcium Phosphate) F. G.
- DATOX -(Toxin Binder)
- Phytase 5000 FTU/Gm Granular

Contract Manufacturing
Mineral Mixtures
(As per clients requirements)

Trading Speciality
- Minerals
- Vitamines
- Solvents

All Types of Chemicals related to
Animal, Cattle & Poultry Feed Supplements
PREMIX CHOL
FEED GRADE

Description:
Choline chloride is the most widely used and most economical form of choline for supplementing diets. Mainly used as an animal feed additive.

Generally classified as a B-complex vitamin (referred to as vitamin B4 in some publications), choline influences the metabolism of carotene and vitamin A in animals. It is in fact an essential component for ensuring the proper functioning of the nervous system. Choline plays a vital role in a number of different ways:

- by building and maintaining cell structures;
- by forming acetylcholine for the transmission of impulses;
- by preventing perosis in poultry; and
- by building lecithin.

DIFFERENT GRADES:

- Premix Chol 97% - 98% F. G.
- Premix Chol CORN COB Base 60% F. G.
- Premix Chol CORN COB Base 50% F. G.
- Premix Chol Silica Base 50% F. G.
- Premix Chol Cerial Base 60% F. G.
- Premix Chol 75% F. G.
We are engaged in manufacturing and supplying **Premix Chol 75% Liquid / F.G.**. Our ingenious professionals process the offered chemical with complete accuracy under favorable conditions using standard quality chemical compounds at par with the set industry standards. Our quality auditors perform rigorous examining procedures on this chemical on the grounds of purity, effectiveness and quality. Beside this, offered **Premix Chol 75% Liquid / F.G.** is clear and colorless in appearance.

**What is this product for?**
It is indicated for the prevention of fatty liver disease in pigs, poultry and other animals. For the prevention of perosis in poultry.

**Description Characteristics**
Chemical name — PREMIX CHOL 75% liquid / F. G.
Form — Liquid
Color — Colorless

<table>
<thead>
<tr>
<th>Purity</th>
<th>Storage:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Physical Appearance — Colorless Liquid</td>
<td>• Keep in a dry, cool and well-ventilated place.</td>
</tr>
<tr>
<td>Content % w/w — 73% TO 75%</td>
<td>• Store at room temperature in the original container.</td>
</tr>
<tr>
<td>PH value — 6-8</td>
<td>• Protect from light.</td>
</tr>
<tr>
<td>Packing: 200 kg Drum Packing</td>
<td>• Once opened, use content immediately.</td>
</tr>
</tbody>
</table>

**Premix Chol 97% - 98% F. G.**

As a reputed enterprise of the industry, we are involved in offering superior quality **Premix Chol Pure**. It is regarded as an important additive in feeds specifically for chickens where it enhances growth. Offered chemical is mostly recommended for its effectiveness, unbeatable quality and enhanced shelf life as compared to other chemicals present in the market. Furthermore, this effective **Premix Chol Pure** is also present in foodstuffs as phosphatidylcholine.

**Features:**
• Purity • Highly effective • Accurate composition • Non-allergic

Premix Chol Silica Base 50% F. G.

- Premix Chol 50% silica base is obtained by absorbing Premix Chol liquid on a synthetic silica fine powder.
- Premix Chol is an absolutely necessary basic part of human being and animals. It is normally regarded as Vitamin B4, which belongs to Vitamin B group.
- As one kind of Vitamin, Premix Chol plays vital basic roles that cannot be completely replaced by another materials.
  1. A component of Cell Membrane
  2. Facilitates the catabolism of fat, reduce the risk of fatty liver
  3. Transmits neural signals.

Premix Chol Cerial Base 60% F. G

We are involved in supplying and manufacturing Premix Chol 60% Cereal Base for our highly honored clients. Its is processed under the utmost hygienic conditions as per the set industry norms and standards. Premix Chol 60% Cereal Base goes through various parameters of quality check to ensure its flawliness. It is widely appreciated for its features like Eco-friendliness, safe usage and effectiveness. We offer it to our clients at highly pocket-friendly prices in the market among our competitors.

DI CALCIUM PHOSPHATE
FFED GRADE

The product is widely used as an additive of feed for livestock and domestic fowls and as supplementary of phosphorus and calcium needed by them. Osteomalacia and Rickets can be prevented for livestock and fowls by adding it in their feed. The product has Ca/P, similar to that in skeleton of animals. Also, the product can completely dissolve in animal's gastric acid. Therefore, it is easy to enter into the body of animal to take part in the process of metabolism and formulate the hormones (enzyme and vitamins) needed in organism to keep a certain proportion of calcium and phosphorus in skeleton and promote rapid growth of animals.

Uses and Benefits

"The product is widely used as an additive of feed for livestock and domestic fowls and as supplementary of phosphorus and calcium needed by them.
"Used to promote the hybridization rate, embryo protect rate and survive rate of domestic animals
"Improves the disease bearing capability of domestic animals, forefend many diseases.
"Promote the animal's growth rate, re-production capability, hatchability/ fertility rate
"Promote the quality of eggs and flash, promote the output of milk
"Improves digestion, feed conversion ratio and utilisation of nutrients

Physical and Biological Properties

| Appearance | White Crystalline free flowing tasteless Powder |
| Chemical Solubility | Excellent - Relatively Soluble in dilute Hydro Chloric & Nitric Acid but relatively Insoluble in Water and Alcohol |
| Biological availability | Excellent |
| Odour | Odourless |
| Organic Impurities/ Proteinous Impurities | Shall pass the test |
| Spores of Bacillus Anthracis and Clostridium Species | Nil |

Composition

1. Moisture (tested at 600C, under vacuum or as per IS 5470: 2002) 5.00 % max.
2. Calcium - Ca 23.00 % min.
3. Phosphorus - P 18.00 % min.
4. Flurine - F (tested as per IS 5470: 2002) 1000 ppm max.
5. Loss on Ignition (L.O.I) of moisture free sample 22.00 % to 26.50 %
6. Acid Insoluble Ash 1.00 % max.
7. Total Ash of moisture free Sample 73.50 % to 78.00 %
8. Lead - Pb 30 ppm max.
9. Arsenic - As 203 10 ppm max.

Usage Recommendations of Pushp Ahaar

- "Mix 1.00 kg to 2.00 kg per 100.00 Kg Poultry Feed or feed 1.20 gm to 2.40 gm per bird daily
- "Mix 1.34 kg per 100.00 kg Cattle Feed or feed 67.00 gm per adult milk animal, 17.00 gm per small animal and 34.00 gm per adult/ dry animal daily or as advised by nutritionist/ veterinarian
DATOX
TOXIN BINDER AND MOLD INHIBITOR

MYCOTOXINS Pose a big Threat to profitable Animal production performance and a detrimental effect on the health. AFATOXINS decreases digestive enzymes, decreases the Egg production. DATOX offers a Double fold mode of action. The Kilned and Graded Hydrated sodium calcium alumino-silicates(HSCAS) adsorbs TOXINS and Moisture in feed thereby inhibiting Binding Sites of the moulds. DATOX has selected organic acids which Lower the PH of the gut and stuns the Growth of Moulds and formation of the MYCOTOXINS / AFLATOXINS. DATOX has herbal Extracts. Yeast Culture nad Stabilisers which protect the Liver and improves FCR.

BANDOX CONTAINS ACTIVATED CHARCOAL FOR ADSORPTION OF TOXINS AND OTHER HARMFUL RESIDUES OF INSECTICIDES

INDICATIONS:
FEED CONTAMINATED WITH AFLATOXINS, TRICHTHECENES, OCHRATOXINS A, ZEARALENONE, FUMONISINS.
DEPRESSED FEED CONSUMPTION AND WEIGHT GAIN
DEPRESSED IMMUNE RESPONSE DUE TO MYCOTOXICOSIS

DOSE:
RECOMMENDED USAGE LEVEL PER TONNE OF FEED ON BASIS OF MOISTURE CONTENT IN FEED
USE 500gms to 750gms PER TONNE OF FEED UP TO 13% OF MOISTURE IN FEED.
USE 1KG TO 1.5KG PER TONNE OF FEED ABOVE 13% OF MOISTURE.
